

Homework assignment #2

For the homework assignment you need to use PGP. There are several free implementations of PGP, for instance GnuPG¹ (Linux/BSD/MacOS) and Gpg4win² (Windows).

1. (a) The website <http://satoss.uni.lu/ton/contact.php> lists two public keys for the e-mail address `ton.vandeursem@uni.lu`. Find out which of the two keys has the following fingerprint:

D02A C861 E612 2619 196E A305 B900 6F72 2F55 2956

-
- (b) Send an encrypted e-mail with your name to the e-mail address using the public key found in assignment (a).
